NUMERICAL HEAT TRANSFER

An International Journal of Computation and Methodology

PART B: FUNDAMENTALS

CONTENTS

Vol. 60 No. 1 2011

1 Fixed and Deforming Grid Solutions of Solidification in an Undercooled Melt: A Benchmark Problem **M. Liang and V. R. Voller**

18 A Simplified Model with a Hybrid Analytical-Numerical Solution for Predicting the Unsteady Conjugate Heat Transfer Process in Pipelines **Jean F. B. Machado, Cezar O. R. Negrão, Silvio L. M. Junqueira, Rigoberto E. M. Morales, and José L. Lage**

34 An Accurate Nodal Heat Balance Integral Method with Spatial Subdivision **S. L. Mitchell**

57 The Method of Fundamental Solutions for Solving the Backward Heat Conduction Problem with Conditioning by a New Post-Conditioner **Chein-Shan Liu**

CONTENTS

Vol. 60 No. 2 2011

73 Quantum-Behaved Particle Swarm Optimization with Ring Topology and Its Application in Estimating Temperature-Dependent Thermal Conductivity **Na Tian, Jun Sun, Wenbo Xu, and Choi-Hong Lai**

96 Development of a Particle Interaction Kernel for Convection-Diffusion Scalar Transport Equation **Chinlong Huang, Tony W. H. Sheu, Takuji Ishikawa, and Takami Yamaguchi**

116 A Self-Adaptive Strategy for the Time Integration of Navier-Stokes Equations **F. X. Trias and O. Lehmkuhl**

135 Comparative Analysis of Thermal Models in the Lattice Boltzmann Method for the Simulation of Natural Convection in a Square Cavity **Seok-Ki Choi and Seong-O Kim**

CONTENTS

Vol. 60 No. 3
2011

147 Fully Coupled 3-D Conjugate Heat Transfer Algorithm for Borehole Heat Exchanger Performance Prediction **Allen J. Baker, Cheng-Xian Lin, Joe A. Orzechowski, and Cormack Gordon**

168 Reevaluation of the Vertex Collocated Mesh for Primitive Variable Computation of Incompressible Fluid Flows by Enforcing Continuity-Based Boundary Conditions **J. R. Figueiredo and K. P. M. Oliveira**

179 Development of an Upwinding Scheme through the Minimization of Modified Wavenumber Error for the Incompressible Navier-Stokes Equations **Tony W. H. Sheu, Neo S. C. Kao, P. H. Chiu, and C. S. Lin**

203 Smoothing Difference Scheme in a Moving Particle Method **Yao-Hsin Hwang**

CONTENTS

Vol. 60 No. 4
2011

235 R-Matrix Theory for Nanoscale Phonon Thermal Transport across Devices and Interfaces **K. G. S. H. Gunawardana and Kieran Mullen**

252 A Finite-Volume Model for Fluid Flow and Nonequilibrium Heat Transfer in Conjugate Fluid-Porous Domains Using General Unstructured Grids **Christopher T. DeGroot and Anthony G. Straatman**

278 The Modal Substructuring Method: An Efficient Technique for Large-Size Numerical Simulations **P. O. Laffay, O. Quéméner, A. Neveu, and B. Elhajjar**

305 A Lie-Group Adaptive Method to Identify Spatial-Dependence Heat Conductivity Coefficients **Chein-Shan Liu**

CONTENTS

Vol. 60 No. 5
2011

325 Benchmark Solution for a Three-Dimensional Mixed-Convection Flow, Part 1: Reference Solutions **Xavier Nicolas, Marc Medale, Stéphane Glockner, and Stéphane Gounand**

346 Benchmark Solution for a Three-Dimensional Mixed-Convection Flow, Part 2: Analysis of Richardson Extrapolation in the Presence of a Singularity **Xavier Nicolas, Stéphane Gounand, Marc Medale, and Stéphane Glockner**

370 A Moving Particle Method with Embedded Pressure Mesh (MPPM) for Incompressible Flow Calculations **Yao-Hsin Hwang**

399 Optimal Heat Input for Estimating Luikov's Parameters in a Heat and Mass Transfer Problem **Abdelmalek Bensefia, Mohammed Boussaid, and Tahar Loulou**

CONTENTS

Vol. 60 No. 6
2011

425 An Unstructured Finite-Volume Method for Structure–Electrostatics Interactions in MEMS **Shankhadeep Das, Sanjay R. Mathur, and Jayathi Y. Murthy**

452 Extension of the Discrete Ordinates Interpolation Method to Combined Convection-Radiation Problems with Fluid Flow in Three-Dimensional Geometries Filled with Gray Participating Media **Kihwan Kim and Tae-Ho Song**

472 Hybrid Spline Difference Method for Steady-State Heat Conduction **Chi-Chang Wang, Huang Chen-Hung, and Dane-Jong Yang**

486 Effect of Turbulence Models and Near-Wall Modeling Approaches on Numerical Results in Impingement Heat Transfer **Erhan Pulat, Mustafa Kemal Isman, Akın Burak Etemoglu, and Muhiddin Can**
